BY NEOPOST

## Know Where Each Asset Is Located

### Track Inbound Packages And Business Assets, Anywhere, Anytime

Neopost provides the tools you need to automate and manage your operations. Whether it is by tracking the chain of custody of inbound packages or managing the logistics of your business assets, WTS tracking software by Neopost gives you the visibility you need to simplify and better manage processes in your organization.

#### Receive

Scan the carrier tracking number on incoming packages, select the recipient and enter any other data required

#### Deliver

Choose the fastest internal delivery route based on recipient location

#### Confirm

Capture recipient signature upon delivery

### Never Lose Another Inbound Item Again

Moving mail and packages is a two-way street. Outbound traffic is only half the story. When receiving important mail, packages and other inbound items requiring proof of delivery at your facility, the tracking process starts all over again. Manual processes are time-consuming, labour-intensive and error-prone.

With WTS, you can track and monitor the internal movement and complete chain-of-custody for every piece of accountable mail that your company receives.

Designed for businesses of any size, WTS provides numerous convenient services to automate all your inbound delivery requirements. It dramatically improves the management of your company's internal delivery process by increasing reliability, accelerating productivity and decreasing costs.
